# Lab #5 OOT

I. Challenge 1
   A. State transition 'EXHAUSTED' -> 'IDLE' via 'rest()'
   B. Mana restored to 600 after 'rest()' from a drained state

II. Challenge 2
   A. 'spellSurge() while 'IDLE' ('InvalidStateException' thrown)
   B. No mutation of mana after the rejected call

III. Challenge 3
   A. Mana at exactly 0 should be valid
   B. Mana just under 0 should be invalid (assuming 'ManaInvestedException' should be thrown)
   C. Mana far past the boundary should be invalid ('ManaInvestedException')
   D. Mana roughly half should be valid
   E. Mana should be unchanged after rejection

IV. Challenge 4
   A. Barrier active when receiving damage greater than mana store should not result in negative mana when using the subclass

V. Challenge 5
   A. 'Archmage' surge with output > 200
   B. Stance, mana, and consecutive surges should be mutated as expected according to the 'Wizard' contract

VI. Challenge 6
   A. Same sequence on 'Wizard' and 'Archmage' should result in the same behavior (except power multiplier)

VII. Challenge 7
   A. The transferer mana should decrease by the same amount the receivers mana increases

VIII. Challenge 8
   A. Using a 'Spell' and a 'Object' for 'castSpell()' should result in the same effects given the same parameters (different names)
   B. Using a wrapper for safe message handling
